Does RPL work with 500+ devices?

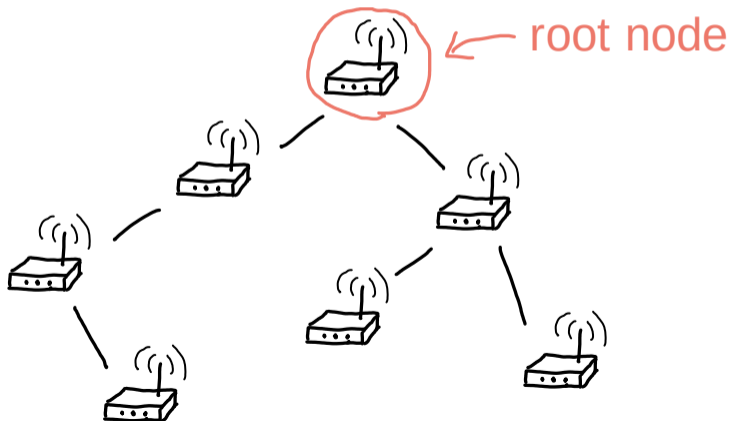

Does **RPL** work with **500+ devices**?

YES, BUT...

IPv6 routing protocol for low-power and lossy networks (RFC 6550)

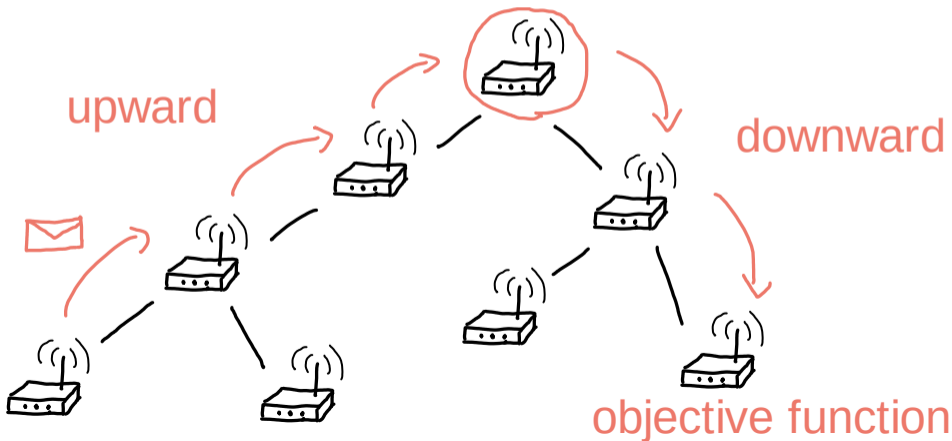

IPv6 routing protocol for low-power and lossy networks (RFC 6550)

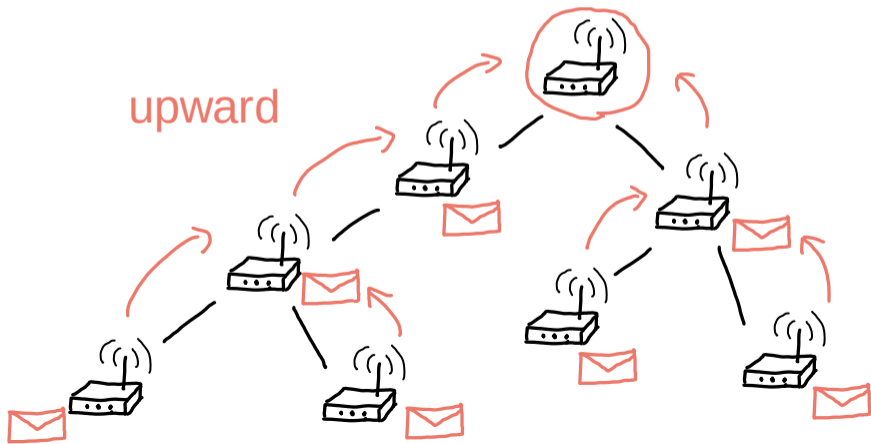

IPv6 routing protocol for low-power and lossy networks (RFC 6550)

IPv6 routing protocol for low-power and lossy networks (RFC 6550)

Scenario: **Data collection** with RPL

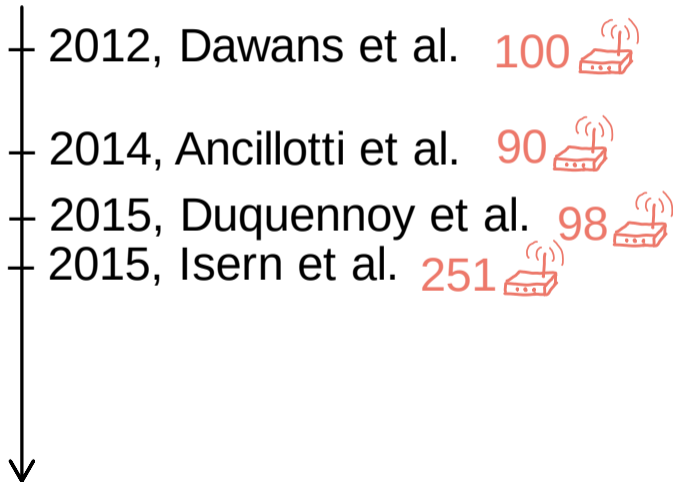

Challenge: **Scaling up** the RPL network

40 msg/s

Impact of network density

packet reception ratio

40 msg/s

Scaling up the network

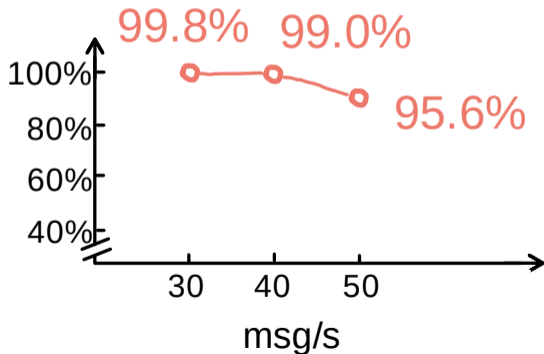

700 client nodes

1 root node

Performance with 700 devices

packet reception ratio

Does **RPL** work with **500+ devices**?

YES, BUT...

Does **RPL** work with **700 devices**?

YES, BUT...

Does RPL work with 700 devices?

YES, BUT...

- ...root node location
- ...transmission power
- ...exceptionally long links (load balancing!)

Thank you!

RPL at scale: Experiences from a performance evaluation on up to 700 IEEE 802.15.4 devices
