1 Books

1. Analysis of algorithms and data structures, (with L.Banachowski and A.Kreczmar) Addison Wesley 1992.
2. Efficient parallel algorithms (with A. Gibbons), Cambridge University Press 1988
3. Text algorithms, (with M.Crochemore), Oxford University Press, New York 1994
4. Algorithms and data structures (with L. Banachowski, K. Diks), WNT 96, in Polish
5. Fast parallel algorithms for matching problems in graphs, Oxford University Press 1998

2 Refereed Publications

1. The dimension of stability of stochastic automata, Information and Control 24:3 (1974)
2. The strong stability problem for stochastic automata, Bulletin de L'Academie Polonais de Sciences, 21:3 (1973)
3. The dimension of strong stability of minimal state stochastic automata, Bulletin de L'Academie Polonais de Sciences, 21:3 (1973)
4. On controlled simple programs, Fundamenta Informaticae, (1978)
5. Functional automata, Fundamenta Informaticae 3 (1980)
6. Some properties of trace languages, Fundamenta Informaticae (1983)
7. A correct preprocessing algorithm of Boyer-Moore string searching, SIAM Journal on Computing 9 (1980), 509-512
8. An effective simulation of two-way pushdown automata with many two-way and one-way heads, IPL 12:5 (1981)

9. The dynamic simulation of recursive and stack manipulating programs, IPL 13:2 (1981)

10. A hardest language recognized by two-way nondeterministic pushdown automata, IPL 13:5 (1981)

11. Time complexity of multihead one-way pushdown automata, IPL 1982

12. Time complexity of unambiguous path systems, IPL 15:3 (1982)

13. A note on two-way nondeterministic pushdown automata, IPL 15 (1982)

14. A simulation result for two-way pushdown automata, IPL (1983)

15. Time complexity of loop-free two-way pushdown automata, IPL 19:4 (1984)

16. Remarks on the pyramidal structure, CAAP'83, Lecture Notes in Computer Science 159 (1983), Springer-Verlag

17. W. Rytter, The space complexity of the unique decipherability problem, IPL 16 (4) 1983

18. Fast recognition of pushdown automaton and context-free lanaguages, Information and Control 67 (1985),12-22, preliminary version in MFCS'84

19. On linear context-free languages and multihead one-way automata, IPL 19:4 (1984)

20. On the complexity of traversing the labyrinth, in Graph Theory, Lecture Notes in Mathematics 1018 (1983) Springer-Verlag

21. The complexity of two-way pushdown automata and recursive programs, In Combinatorial algorithms on words (ed.A.Apostolica, Z.Galil), Springer-Verlag (1985)

22. A characterization of reversal bounded multipushdown machines, *Theoretical Computer Science* (1986)

23. Parallel time O(log n) recognition of unambiguous cfl's, Information and Computation 73:1 (1987) 75-86, preliminary version in FCT'85

24. Optimal parallel algorithms for dynamic expression evaluation and applications to context-free languages (with A.M.Gibbons), Information and Computation (1989), preliminary version in FST&TCS'86

25. On the decidability of some problems about rational subsets of free partially commutative monoids, *Theoretical Computer Science* 48 (1986) 329-337

26. Remarks on string matching and one-way multihead pushdown automata, (with M.Chrobak), IPL 24 (1987) 325-329

27. Parallel O(log n) time optimal edge-colouring of trees and Halin graphs, (with A.Israeli, A.Gibbons), IPL 27 (1988)

28. Fast parallel algorithms for edge-colouring of some tree-structured graphs, (with A.Gibbons), FCT'87, Lecture Notes in Computer Science, Springer-Verlag (1987)

29. Optimal edge colouring of outerplanar graphs is in NC, *Theoretical Computer Science* (1990)

30. A note on optimal parallel transformations of regular expressions to finite automata, IPL (1988)

31. Remarks on pebble games on graphs, Zastosowania Matematyki (1988)

32. Fast parallel computations for some dynamic programming problems, *Theoretical Computer Science* (1988)

33. Optimal parallel parsing of bracket languages, (with R.Giancarlo), *Theoretical Computer Science* (1987)

34. On the parallel complexity of parsing general context-free languages, *Theoretical Computer Science* 47 (1987)

35. On the recognition of context-free languages, Computation Theory (ed.A.Skowron), Lecture Notes in Computer Science, 208 (1985), 318-325

36. The unique decipherability problem for partially commutative alphabets (with M.Chrobak), Fundamenta Informaticae (1988), preliminary version in MFCS'86

37. A transformation of nondeterministic recursive programs to deterministic efficient ones, (with.R.Giancarlo), Fundamenta Informaticae (1988)

38. Usefulness of the Karp-Miller-Rosenberg algorithm in parallel computations on strings and arrays, *Theoretical Computer Science*, (1991) 58-82

39. On the parallel recognition of unambiguous context-free languages (with M.Chytil, M.Crochemore, B.Monien), Theoretical Computer Science 81 (1991) 311-316

40. Application of Mehlhorn's algorithm for bracket languages to the recognition of input driven languages, IPL 23 (1986) 81-84

41. Maxime Crochemore and Wojciech Rytter. Parallel construction of minimal suffix and factor automata. Information Processing Letters, 35(3):121-128, (1990)

42. Efficient parallel computation of the travelling salesman problem in Halin graphs, in Optimal algorithms, (with K.Diks), Lecture Notes in Computer Science (1989)

43. Parallel algorithms for classes of graphs generated recursively (with T.Szymacha), IPL (1988)

44. Parallel computations of paths on a grid graph, IPL 29 (1988) 71-74

45. Parallel algorithms for lexicographically first problems on tree-structured graphs, in MFCS'89, Lecture Notes in Computer Science 379 (1989)

46. On the parallel computation of expressions and straight-line programs, Computers and artificial Intelligence, 9:5 (1990) pp. 427-439

47. Optimal parallel recognition and colouring outerplanar graphs, in MFCS'89, Lecture Notes in Computer Science, 379 (1989).

48. Optimal parallel algorithms for testing isomorphism of trees and outerplanar graphs,(with A.Lingas), in FST&TCS, 1990, Lecture Notes in Computer Science, Springer-Verlag (1990)

49. Efficient parallel algorithms to test square-freeness and factorize strings, (with M.Crochemore), Information Processing Letters, 38 (1991) 57-60

50. On the complexity of the parallel recognition of 2D-images, (with A.Saoudi), Inf.Proc.Letters 38 (1991) 225-229

51. Efficient sublinear time parallel algorithms for dynamic programming problems and recognition of context-free languages (with L.Larmore), STACS'92, LNCS, Springer-Verlag 1992

52. On the size of test sets for regular languages (with J.Karhumaki), MFCS'91, Lecture Notes in Compure Science, with final version in *Theoretical Computer Science*

53. Exact analysis of three tree contraction algorithms, FCT'91, Lect. Notes in Computer Science, Springer Verlag 1991

54. Speeding up two string matching algorithms, STACS'92, LNCS, Springer-Verlag 1992, final version in Algorithmica 12 (1994) 247-267

55. Efficient randomized parallel algorithms for the maximal f-matching problem (with A.Lingas), in LATIN'92, LNCS, Springer-Verlag 1992 (1991) 58-82

56. On optimal parallel computations on sequences of brackets, *Theoretical Computer Science* 87 (1991), 251-262

57. Parallel recognition and ranking of cfl's, MFCS'92, LNCS 629, Springer-Verlag 1992

58. Observations on log n time parallel recognition of unambiguous cfl's (with P. Rossmanith) IPL 44 (1992) 267-272

59. On optimal parallel algorithm for two dimensional string matching, International Conference on Image processing, Ube, Japan, December 1992

60. Parallel recognition of 2D-images, Proceedings of the International Conference on Pattern Recognition, The Hague, the Netherlands, 1992

61. Parallel recognition of dcfl's with smaller number of processors (with B.Monien and H. Schapers), *Theoretical Computer Science* 1993

62. On parallel recognition of two classes of 2D-array patterns, International Journal of Pattern Recogn. and Artificial Intelligence 6:2, 1992, 293-299

63. (with M.Karpinski) Optimal parallel searching for 3-dimensional patterns, in Combinatorial Pattern Matching 1994, Lecture Notes in Computer Science. *Theoretical Computer Science* 205(1-2): 243-260 (1998)

64. (with M. Crochemore) A note on optimal parallel 2-dimensional pattern matching, *Theoretical Computer Science* 1994

65. (with L. Gasieniec) Recursive approach to string-matching: the zooming method, *Theoretical Computer Science* 1995

66. Context free recognition by shortest path computation: a version of Valiant's algorithm, *Theoretical Computer Science* 143(2): 343-352 (1995)

67. (with L. Larmore), An optimal sublinear time parallel algorithm for some dynamic programming problems, IPL 52 (1994) 31-34

68. Parallel construction of alphabetic trees (with Larmore and Przytycka), in SPAA'93.

69. (with M. Chrobak) Embedding trees into lines, Theoretical Computer Science 136 (1994)

70. Speeding-up two string matching algorithms, (with A. Czumaj), Algorithmica 12 (1994) 247-267

71. Cubes, squares and time space efficient string matching, (with M.Crochemore) Algorithmica 13,5 (1995) 405-425

72. (with J.Karhumaki), Polynomial size test-sets for context-free languages, in ICALP 92, final version with Journal of Computer and System Sciences 50, 1 (1995) 11-19.

73. (with R.Cole and others) Parallel one and two-dimensional preprocessing and pattern matching, in FOCS 1993.

74. (with M. Crochemore) On alphabet-independent linear time algorithms for two-dime nsional pattern-matching, LATIN'95, Lecture Notes in Computer Science, Springer-Verlag (1995)

75. (with M. Crochemore) Two dimensional pattern matching in linear time and small space, STACS'95, Lecture Notes in Computer Science

76. (with A. Gasieniec, W. Plandowski) String matching in small time and space, Combinatorial Pattern Matching 1995, Lecture Notes in Computer Science 1995

77. Wojciech Plandowski, Wojciech Rytter, and Tomasz Szymacha. Parallel tree-contraction and Fibonacci numbers. Information Processing Letters, 59(5):267-271, 9 September 1996

78. L. Larmore and M. Karpinsk, W. Rytter, Sequential and parallel subquadratic work constructions of approximately optimal binary search trees, *the 7th ACM Symposium on Discrete Algorithms, SODA'96*

79. O.Garrido, S.Jarominek and A. Lingas, W. Rytter, A simple randomised parallel algorithm for maximal f-matchings, Information Processing Letters, 57 (1996) 83-87

80. L.Gasieniec, M.Karpinksi, W.Plandowski, W. Rytter, Randomized algorithms for compressed texts: the finger-print approach, Combinatorial Pattern Matching 1996, Lecture Notes in Comp. Science, Springer Verlag 1996
